

PLASTIC SYSTEMS supervision software allows controlling all the machines of a plant:

- Storage silos.
- Centralized / single dehumidification .
- Manual / automatic manifolds.
- Automatic Centralized feeding system to processing machines.
- Dosing station.

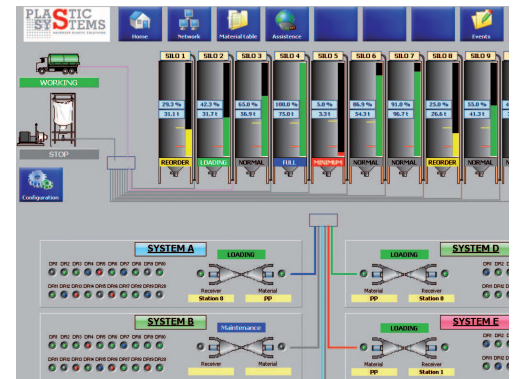

### ADDED VALUE:

- Full control of the process: from silos to processing machines.
- Traceability of supplied materials.
- Optimization of the operating parameters according to production with energy saving.
- Flexible and easy-to-use operator interface.
- Communicate and interface with barcode mobile devices, tablets, laptops.
